Butterfly Training Brochure

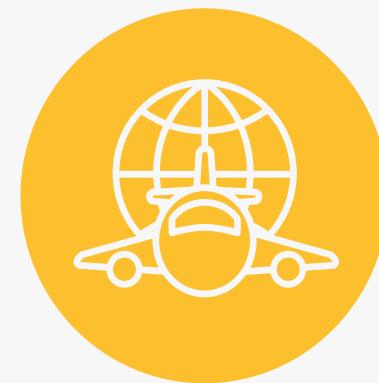

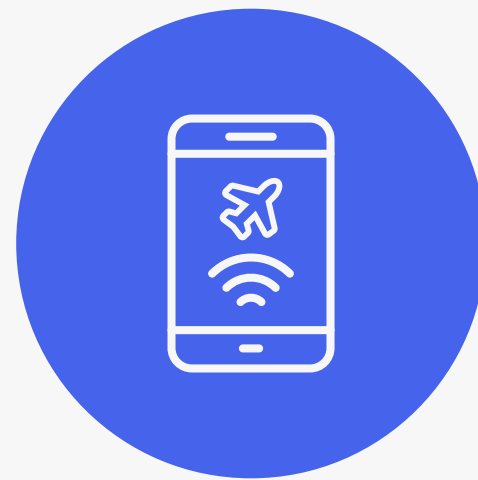

●

Butterfly Training is the industry leader across Europe in e-learning training for the aviation industry.

●

Our expertise and values

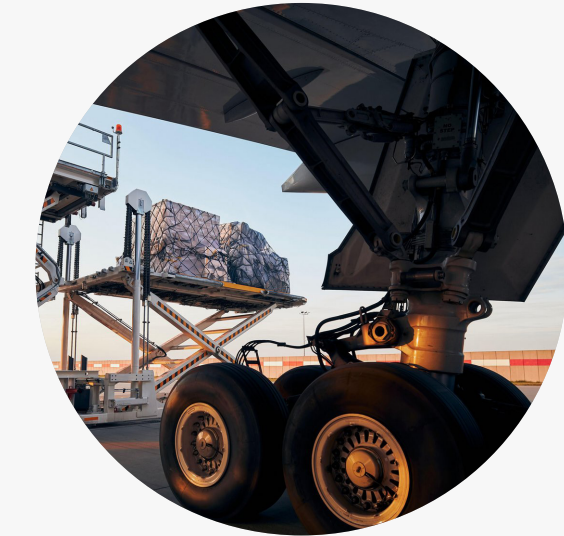

An innovative player in airport training for 20 years, we were the first to develop regulatory compliant **e-learning training courses for the aviation industry.**

All of our courses are designed by subject-matter experts, to meet the specific needs in terms of **safety, security and airport operations.**

The Butterfly Training team is built around **highly skilled subject matter experts** with a range of backgrounds in various sectors from International Civil and Military Aviation & various European and US Aviation Authorities.

Thanks to our innovative teaching methods and our esteemed network of partners, we guarantee high-level training courses which **comply with the latest European and International regulations.**

Our values are based on three main principles:

- ✘ **Pedagogy**
- ✘ **Innovation**
- ✘ **User experience**

●
Key figures:

Approvals in
14 countries

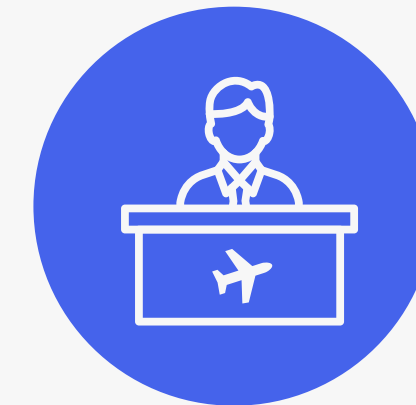

9 training
platforms

10 training
languages

4 consecutive
global IATA
awards
2022 and 2023

We train
100,000
people
around the world

For
2,500
valued clients
in Europe and
around the world

- Payment by secure bank protocol
- Personal data protected by encrypted protocol

> 96% customer satisfaction

> 93% learner satisfaction

* Last update Sep. 2024.

For its face-to-face training courses, Butterfly Training provides you exclusively with IATA-certified or locally approved teaching experts.

Technologies

LEARNING MANAGEMENT SYSTEM (LMS)

Our **proprietary LMS** is a technology that has been 100% developed in-house since our creation and adapted to the specific needs of the aviation industry.

- Graphic customisation
- Multilingual
- Learner workspace
- Manager workspace
- Single encrypted log-in
- SCORM compatible
- Modular creation
- Tracking progress
- Assessment suite
- Secure e-Certificates

ARTIFICIAL INTELLIGENCE

Always keen to offer **innovative solutions**, we have launched our ChatBot ‘Papillon’, a virtual instructor equipped with artificial intelligence to answer your questions throughout the course and assist you with understanding your training topic to the highest level.

ADAPTIVE LEARNING

Adaptive learning consists of offering **personalised learning experiences** that meet the unique needs of an individual, training is refined through pre-assessment tests, pathways and resources according to the needs of each profile (rather than offering a linear learning experience).

E-LEARNING STUDIO

Digitise your company-specific training courses. Call on our e-Learning Development Studio and get your training projects digitised. We can support you in the **digital transformation of your training materials**.
